A Customer-Driven Global Company

Established in Europe in 1998, Auger Torque has created a new standard in the Earth Drill and Trencher Attachment market by putting you, the customer, at the centre of everything we do.

In 2005, after surveying the market carefully, we released a new range of innovative products, designed to provide unrivalled reliability and cost effective operation.

Auger Torque is proud to have become part of the Kinshofer Group of companies in 2015. With the backing of the German attachments giant Auger Torque has since enjoyed even greater growth in all areas of its business operations.

Auger Torque's six manufacturing bases around the globe are busy satisfying the ever-growing demand for high-quality products in over seventy countries and on all seven continents.

Auger Torque - A manufacturing company with Global distribution and dealer networks.

Innovation and Special Features

Robust Construction

- O Manufactured from high grade materials and precision engineered components
- O Designed to withstand extreme working conditions
- O High grade synthetic gear oil used for extra protection and long service life

Non-Dislodgement Shaft SECURITY

- O Unique design
- O Single piece drive shaft
- O Lifetime warranty against shaft dislodgement

Pilots

TOUGHNESS & ACCURACY

- O Earth, Tungsten, Extra Dig and Rock Pilots
- O Tough forged construction
- O Easy fitting

Planetary Gearbox

- Designed, manufactured and assembled by Auger Torque
- O Torque amplifiedO High efficiency
- O Extreme durability

Shallow Pitch Flights EFFICIENCY

- O Piling industry technology
- O Holds earth on flights on removal
- O Most efficient ratio between quantity of earth removed and speed of operation

Pilot Extensions

- O Allows an auger to hold its axis accurately in tough ground conditions
- O Improves performance on sloping ground
- O Simple fitting

Telescopic Extensions ADAPTABILITY

- O Improves efficiency for deep hole drilling
- O Innovative design significantly reduces swap-over time
- O Easy adjustment to 3 heights
- O Available for S5, S6 and PA augers

Constant Spiral Cut IMPROVED PRODUCTIVITY

- O Fresh cut every revolution
- O Tooth holders angled to
- direct spoil onto auger flights efficiently
- O Spoil broken up thoroughly
- O Avoids clogging

Sometimes it's the simple ideas that work best and Auger Torque has always led the industry with creative design. In a world where maximising profit is vital to any business, we believe that our range of high quality attachments will allow you to exploit the full potential of your existing plant.

Modular Cradle Hitch INGENUITY

- O 2 hitches in 1
- O Unique design converts a Double Pin Hitch into a Double Pin Cradle Hitch
- O Stabilises the Earth Drill in transit

2 Way Valve Kits FLEXIBILITY

O Converts single acting hammer circuit into a 2 way auxiliary flow circuit

Pressure Relief Valve SAFETY

- O Helps prevent overloading of the hydraulic circuit
- O Protects the hydraulic motor

Designed for Your Environment

EARTH DRILLS

- Applications include:
- O Fencing
- O Landscaping
- O Tree planting
- O Well boring
- O Foundation piles
- O Screw pile installations
- O Ground source heat pumps
- O Pole and mast installations
- O Road signage
- O Sound barriers
- O Exploration and research

TRENCHERS

- Applications include:
- O Drainage
- O Irrigation
- O Ground source heat pumps
- O Fibre optic installations
- O Electric cable installations
- O Narrow strip foundations
- O Gas and water piping

Our products incorporate many development features. The trench cleaner on our Trencher Attachments ensures a good clean cut with no residual spoil.

At Auger Torque we realise that one of the best ways to continually improve our extensive range of quality attachments is to not only listen to customer feedback but to put practical ideas into production. This policy of direct customer involvement has given us the reputation of being the specialists in the trenching and auger drive industry world-wide.

New products featuring the latest technology ensure that we are able to maximise your efficiency.

Quality is at the forefront of our philosophy.

Our R&D Test Facility puts our attachments through rigorous test procedures that exceed real-life demands.

All of our gearboxes use precision engineered components.

SHOCK LOCK Tooth Locking System

Recognised as the ONLY tooth locking system that works!

Are you tired of losing your teeth down the hole?

With our patented **Shock Lock™** Tooth Locking System this is now a thing of the past. Using the **Shock Lock™** pin and rubber insert in our unique **Shock Lock™** tooth holders ensures your Auger teeth are safely locked in place and protected against shock fractures.

Replacing worn teeth is a breeze with this system, simply knock out the old pin with a standard hole punch and the tooth will slide out of the pocket with ease.

Acclaimed as the best system on the market you will never need to worry about fitting spare teeth due to loss again.

Patented Design International Patents: British Patent: 2404935 European Patent: 1507061 German Patent: 60 2004 009 250-9 Australian Patent: 2004203825 Canadian Patent: 2478443 US Patent: 7383901

"Don't leave your teeth down the hole!"

EARTH DRILLS Features of our Earth Drills

FORGED HOOD EARS

Standard with all Earth Drills in areas that we know will take a lot of strain. All hood pins are locked for extra safety making it impossible for the hood to detach from your hitch.

HOSE & COUPLER OPTIONS

All Earth Drills come standard with high quality hoses and couplers (excludes larger units).

HIGH QUALITY HYDRAULIC MOTORS

8

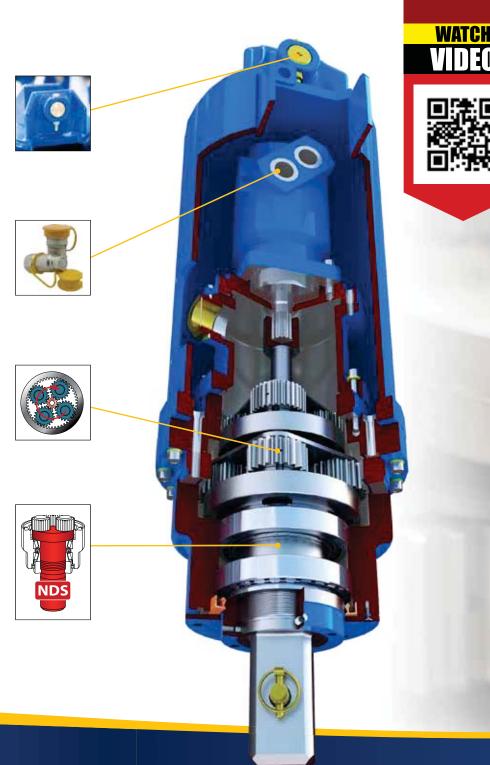

Auger Torque's huge buying power means we work closely with high quality suppliers to develop the most reliable attachments available on the market today.

EPICYCLIC GEARBOX

Torque is amplified by using the unique Auger Torque planetary gearbox. This system allows the motors output torque to be multiplied with extreme efficiency as well as ensuring the durability and reliability you need.

NON-DISLODGEMENT SHAFT

Unique to Auger Torque, the Non-Dislodgement Shaft is a single piece drive shaft assembled top down and locked into the Earth Drill housing. This design guarantees that the shaft will never fall out, making for a safer work environment, not only for the operator but also any surrounding workers, a MUST-HAVE FEATURE for any safety conscious company.

AUGER SUMMARY

Full technical details of Augers, Extensions and Wear Parts can be found in the Auger Section of this brochure.

S2 AUGERS

Auger Torque S2 Augers feature extra long flighted sections of shallow pitch flights. The Augers are fitted with **Earth Teeth** and an **Earth Pilot**.

Available in the follow	ving diameters:
-------------------------	-----------------

100mm	200mm	250mm
150mm	225mm	300mm

** Auger lengths stated include fitted wear parts.

IDEAL FOR FENCING The Earth Drill 1200 is Auger Torque's entry level model however its compact size and robust construction and ability to turn a 300mm Auger make it very popular in the fencing industry.

AUGER SUMMARY

Full technical details of Augers, Extensions and Wear Parts can be found in the Auger section of this brochure.

S4 AUGERS FOR THE 3000TC

Auger Torque S4 Augers feature extra long flighted sections of shallow pitch flights. **Earth, Tungsten** and **Extra Dig** variations are available.

Available in the following diameters:

100mm	250mm	450mm
150mm	300mm	500mm
200mm	350mm	600mm
225mm	400mm	

S4 EXTENSIONS

S4 Auger Extensions are available in the following lengths:

500mm 1M

(other lengths on request)

S5 AUGERS FOR THE 5500TC AND 7000TC

Auger Torque S5 Augers feature extra long flighted sections of shallow pitch flights. **Earth, Tungsten** and **Rock** variations are available.

Available in the following diameters:

150mm	350mm	750mm
200mm	400mm	800mm
225mm	450mm	900mm

45 TONNES 17 **EXCAVATORS**

AUGERS Features of our Augers

HUB OPTIONS

Augers are available with all major standard hubs on the market, including: 2", 2.5", 3"and 4" Hex 50mm, 2" and 65mm Round 57mm, 75mm, 100mm, 110mm and 130mm Square ...to name but a few.

HEAVY DUTY TUBE

We know that our Augers can expect a tough life so we only use the highest grade steel and vary our tube size according to machine size and application. Our Augers have a reputation of being the toughest on the market.

SHALLOW PITCH FLIGHTS

By working with and, more importantly, listening to operators feedback we have developed the perfect pitch for our flights. It will cut at its maximum efficiency and, most importantly the spoil will stay on your Auger when you remove it from the hole.

SHEEK LOCK Tooth Locking System

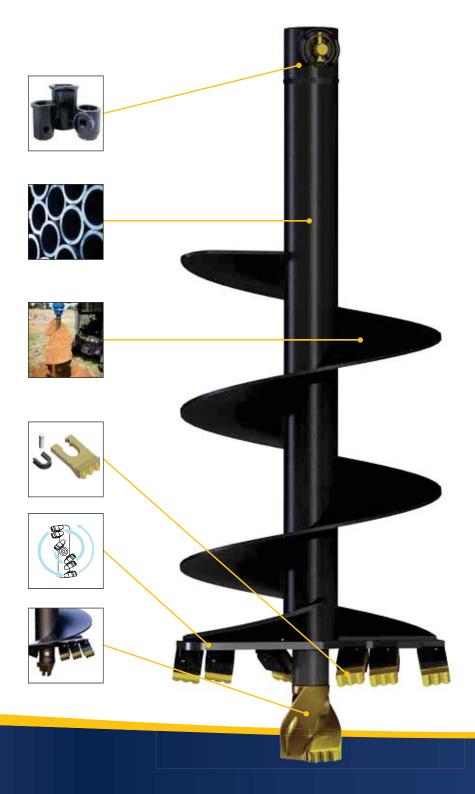

Are you tired of losing your teeth down the hole? With our patented **Shock Lock™** Tooth Locking System loss is now a thing of the past. The simple but effective locking pin holds teeth secure in both directions.

CONSTANT SPIRAL CUT

Our boring heads are designed with a Constant Spiral Cut. Teeth are located so that each makes its own fresh cut on every revolution and are angled to direct spoil towards the centre of the auger. The tooth cutting angle ensures spoil is broken up thoroughly to avoid any clogging.

PILOT AND TOOTH OPTIONS

Auger Torque Augers are offered with many different tooth and pilot options to suit your specific need. For example in the S4 range we offer up to eight different combinations and we have the know-how to help you select the optimal configuration.

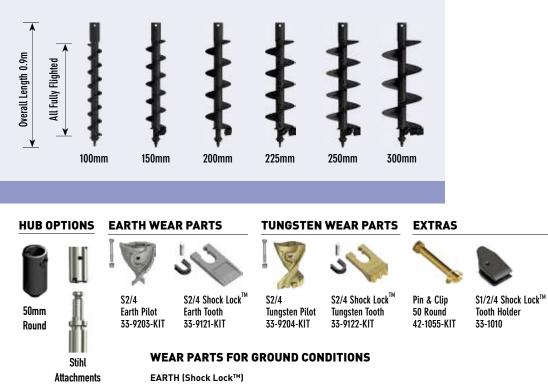

S2 AUGERS

MICRO EXCAVATORS 0.75 - 1 T

With our patented **Shock LockTM** Tooth Locking System tooth loss is now a thing of the past. Using the **Shock LockTM** pin and rubber in our unique **Shock LockTM** tooth holders ensures your Auger teeth are safely locked in place and protected against shock fractures.

Replacing worn teeth is a breeze with this system, simply knock out the old pin with a standard hole punch and the tooth will slide out of the holder with ease. Acclaimed as the best system on the market you will never need to worry about fitting spare teeth due to losing them again.

Best suited to soft grounds like earth and clay.

TUNGSTEN (Shock Lock™)

Best used in dry, hard or medium ground conditions where floating rocks may be encountered. The perfect all-rounder if you are not sure about what you might encounter.

S4 AUGERS

MINI EXCAVATORS 1 - 5 T, MINI LOADERS, SKIDSTEER LOADERS UP TO 80HP AND TRUCK CRANES UP TO 9 T / METRE

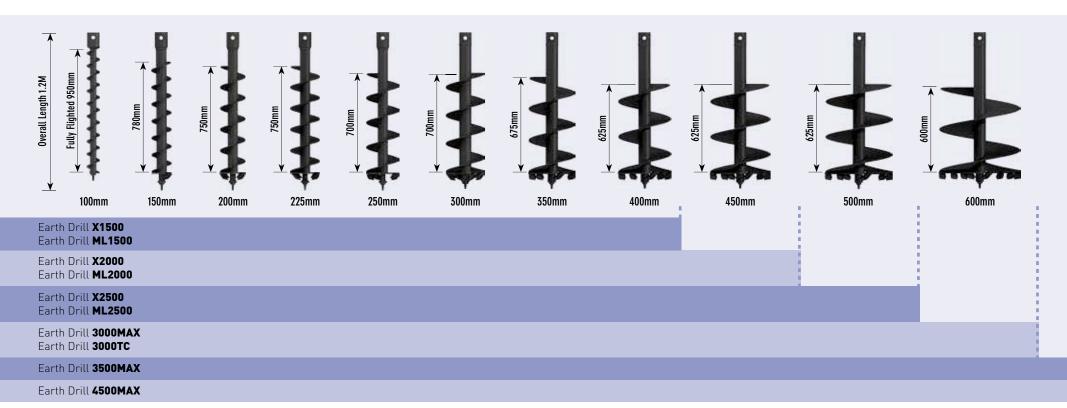

STANDARD HUB OPTION

With our patented **Shock Lock**TM Tooth Locking System tooth loss is now a thing of the past. Using the **Shock Lock**TM pin and rubber insert in our unique **Shock Lock**TM tooth holders ensures your Auger teeth are safely locked in place and protected against shock fractures.

Replacing worn teeth is a breeze with this system, simply knock out the old pin with a standard hole punch and the tooth will slide out of the holder with ease. Acclaimed as the best system on the market you will never need to worry about fitting spare teeth due to loss again.

EARTH (Shock Lock™)

Best suited to soft grounds like earth and clay.

TUNGSTEN (Shock Lock[™])

Best used in dry, hard or medium ground conditions where floating rocks may be encountered. The perfect all-rounder if you are not sure about what you might encounter.

TUNGSTEN CHISEL (Shock Lock™)

Used in conjunction with standard full width Tungsten Teeth. Improves cutting where low down pressure machines are being used, i.e. Mini Loaders, small Skid Steer Loaders & small Excavators. Must only be fitted to the inside tooth holders with standard full width Tungsten Teeth being fitted on the outer most holders.

EXTRA DIG PILOT

A stronger Pilot for more demanding ground conditions.

TCH Auger Range For the most demanding drilling situations

HUB OPTIONS

Tapered Cutting Heads are available in 2 popular sizes; 75mm and 110mm Square.

HEAVY DUTY TUBE

We know that the TCH Auger range will be be used for the toughest applications so we only use the highest grade steel and vary our tube size according to machine size and application.

SHALLOW PITCH FLIGHTS

By working with and, more importantly, listening to operators feedback we have developed the perfect pitch for our flights. It will cut at its maximum efficiency and, most importantly the spoil will stay on your cutting head when you remove it from the hole.

TAPERED CUTTING PATH

Our cutting heads are designed with a Constant Spiral Cut. Teeth are located so that each makes its own fresh cut on every revolution and are angled to direct spoil towards the centre of the Cutting Head. The tooth cutting angle ensures spoil is broken up thoroughly to avoid any clogging.

ROCK PILOT AND TOOTH

Auger Torque Tapered Cutting Heads are offered with our rugged Rock tooth and pilot options to suit your specific need.

FEATURES

- O Drilling performance is increased due to precisely calculated tooth positions along the edges of the cutting head
- O Improved productivity when cutting through hard ground and fractured rock
- O The positioning of the teeth increases the penetrative forces which can be found on the tooth cutting edge
- O This increase in force fractures the substrate into large pieces bringing them to the surface at an increased rate compared to traditional cutting heads
- O Patents Pending: British Patent Pending: 1505626 Australia Patent Pending: 2015201716

Truck Cranes & The Rope Wind Hitch

Growing in popularity, truck cranes allow a great deal of flexibility when working off site. On-board hydraulics allow trucks to deliver materials where no loading facilities are available.

Equally, remote working can be made easy by using the truck crane boom for earth drilling operations. Flat bed trucks equipped with Truck Crane Earth Drills turn telegraph and power pole as well as street light installations into a single man operation and foundation piling can all be facilitated with the use of one vehicle.

> The ingenious Auger Torque Rope Wind Hitch allows for safe and secure storage during transit without the need to disassemble the unit from the boom.

BOOM CLAMP

Auger Torque manufactures all hitches in-house, ensuring custom precision fit to any crane*.

Advise our sales team of the make and model of your crane as lots of variations are available prefabricated off the shelf ready for immediate delivery.

ROPE WIND HITCH

A simple but effective solution for transporting an Earth Drill on a Truck Crane. Utilising the rotation of the Earth Drill the unit can be lifted up under the boom of the crane after use and locked into position, making the whole unit secure during travel.

*Contact Auger Torque for further details.

Our world beating products are now in use on ALL of the world's continents after one of Auger Torque's Earth Drills was used to bore through the ice as part of the Lake Ellsworth exploration project in Antarctica.

BBC News showed an Auger Torque 3000TC taking a lead role in what is considered to be the most important geological survey of the sub-continent in decades; unlocking the secrets of the hidden Lake Ellsworth from beneath the polar ice cap.

The 3000TC was chosen by the British Antarctic Survey for its reliability in extremely demanding conditions. The Earth Drill was used to bore holes in the pack ice for pilot holes. Steve White, the Head of Vehicles Engineering said "Being so remote and having only a narrow window of opportunity to sample the lake means we need to know that the equipment will be 100% reliable. Only the best was going to be good enough for hassle free drilling".

Today, we have equipment working in the full spectrum of temperatures experienced on all seven continents.

> The British Antarctic Survey's choice confirms the confidence we place in our products.

XHT Torque Heads Features of our Screw Pile Torque Heads

Auger Torque is proud to announce the release of our brand new XHT Series Torque Heads. Specifically designed and ideally suited to foundation screw pile applications this series heralds a new era in the world of screw pile torque heads.

The new torque heads are available to suit machines from as little as 24T all the way to 50T and are designed and manufactured in-house at Auger Torque's UK facility, guaranteeing class leading workmanship and the reliability Auger Torque is famous for.

INTEGRAL GEAR OIL COOLING

Our unique design allows for efficient oil cooling via auto circulation of the fluid without the need for an external mechanical pump. This system effectively protects your investment during extreme high torque screw pile applications.

EPICYCLIC GEARBOX

reliability you need.

Torque is amplified by using the unique

system allows the motors output torque

to be multiplied with extreme efficiency

Auger Torque planetary gearbox. This

<u>HIGH QUALITY</u> Hydraulic Motors

As with our Earth Drill range, we use the highest quality suppliers to develop the most reliable attachments available on the market today.

NON-DISLODGEMENT SHAFT

Unique to Auger Torque, the Non-Dislodgement Shaft is a single piece drive shaft assembled top down and locked into the XHT Torque Head housing. This design guarantees that the shaft will never fall out, making for a safer work environment, not only for the operator but also any surrounding workers, a MUST-HAVE FEATURE for any safety conscious company.

Screw Pile Installations

Many of Auger Torque's Earth Drills, from the robust Earth Drill 10,000 upwards, are excellent tools for screw pile installation due to their high levels of torque and range of rotational speed.

Couple this with the all new electronic torque metering linkage block which has an accuracy rating of over 99% and you have all you need for fast and precise Screw Pile installation.

Screw piles can be used as a steel foundation solution for railway and highway installations, masts, towers, cantilever gantries, platforms, lighting columns and sign posts. They support structures in both tension and compression, providing an ideal solution where overturning forces are significant or when ground conditions aren't suitable for other methods of foundation.

Quick and easy to install, in many cases the piles and associated structures can be installed in a day. Using the torque metering linkage block, applied torques can be displayed and logged for data analysis. Made from galvanised steel, Screw Piles are also maintenance free and reusable after removal from temporary installations.

BENEFITS OF SCREW PILES INCLUDE:

- O Quick and easy to install
- O No concrete mixing or curing time
- O No excavations needed or spoil to remove
- O Suitable for soft or mixed composite ground
- O Installations possible in low temperatures and wet conditions
- Can be installed around existing underground services
- O Removable and re-useable

Screw Piles can be made to customers own specifications - talk to your closest Auger Torque main office for more information.

Alignment Monitor

Perfect for Auger and Screw Pile applications, the Auger Torque Alignment Monitor is the essential tool for ensuring your application is precise and quick.

Not restricted to parent machine size, the Alignment Monitor is easy to install. With universal mounting of both the alignment sensor and user display, the sensor is fixed to the top of your existing earth drill. The bright colour display is mounted inside the operators cab in a convenient location. Plug the power lead into the 12/24V power socket, and you're good to go.

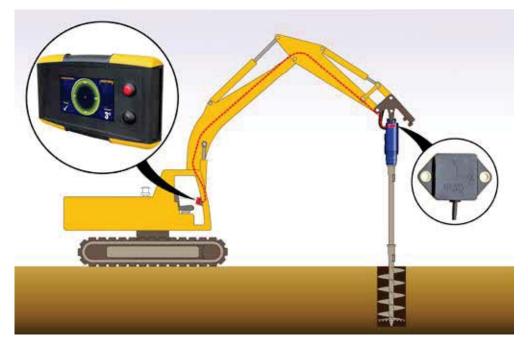

The Alignment Monitor has 4 sensitivity settings from 1 to 5° increments, allowing you to adjust to suit the application.

Now that the operator can see the alignment in all directions, there is no need for additional operatives. Perfectly aligned installations are now a one man operation.

FEATURES

- O Plug and play capability
- O Alignment display easily installed in operator cab
- O A compact, bright colour interface
- O Alignment sensor fits to your existing earth drill
- O Sensitivity adjustment to suit the application
- O IP54 rated suitable for use in all weathers
- O 12-24V operating range
- O One man operation

Torque Monitor

Applying the correct torque during the installation of Screw Piles is paramount to ensure the structure is safely secured.

Receiving data of real-time applied torque which is accurate to 99.7% for this critical procedure is made easy with this new Auger Torque device.

The Torque Monitor is simply attached between the mounting bracket and the Earth Drill hood pin.* The sophisticated sensors inside send instant data to a hand-held PDA, allowing operators to work with ultimate efficiency.

Our Torque Monitor's are able to measure torque values up to 65,000Nm. The Monitor's are ideally suited to the Earth Drill range 10,000MAX - 50,000MAX range and our XHT Torque Head range, but will work in conjunction with the majority of our other Earth Drills.

FEATURES

- O Measure up to 65,000Nm
- O Quick and easy to install
- O Correct torque measurement when installing screw anchors to an accuracy of 99.7%
- O Allows operators to work with ultimate efficiency
- 0 Wireless transmission
- O Real time data transfer
- O Compatible with Auger Torque and OEM earth drills

TRENCHER ATTACHMENTS Features of our Trenchers

HIGH QUALITY MOTOR AND GEARBOX

Using only the highest quality hydraulic motors that allow flow rates of up to 150LPM and then amplified by Auger Torque's own 'bullet-proof' planetary gearbox means that our trenchers have the reliability you need and the power to ensure your trenching is carried out with ease.

EPICYCLIC GEARBOX

Torque is amplified by using the unique Auger Torque planetary gearbox. This system allows the motors output torque to be multiplied with extreme efficiency as well as ensuring the durability and reliability you need.

MULTIPLE TEETH COMBINATIONS

Chains are available in a number of different teeth configurations for trenching in soft ground, mixed grounds and even permafrost, allowing you to get the job done quickly.

ADJUSTABLE DEPTH SKID

A great feature that will make your job much easier is the precision depth control skid, which enables the operator to set the machine at up to three different trench depths.

HOSE & COUPLER OPTIONS

All Trenchers are supplied as standard with high quality hoses and couplers.

The days of your trenching bucket may well be over.

The laborious task of digging a trench has been transformed since the advent of the Trencher Attachment.

Suitable for Loaders and Excavators, Auger Torque's range of Trenchers cover depths from 0.6 to 1.5 meters and widths up to 350mm. The spoil is piled neatly to the side of the trench by the integral auger.

Experience how Trencher Attachments can make light work of your construction project.

Multiple applications including:-

- Ground Heat Pump Systems
 - Drainage & Irrigation
 - Gas / Water Piping
 - o Electric Cable
 - Fibre Optic Cable
 - Larger Bore Gas / Water Piping
 - Hedge & Tree Planting

- O Ground Heat Pump Systems

Aluminium Ramps

Auger Torque Aluminium Loading Ramps have long set the standard by which other ramps are judged.

With carrying capacities ranging from 1.5 to 8 tonnes, our ramps are overengineered to ensure they can safely accept steel or rubber tracks and pneumatic tyres. This means you no longer need to have individual ramps to cope with various means of traction. One set of Auger Torque Loading Ramps does it all.

We use only the highest grade alloy, ensuring that Auger Torque aluminium ramps will have a long and reliable service life.

All our ramps incorporate a unique design feature which prevents bottoming out when loading or unloading. All ramps are supplied with forged locking pins to ensure safe and secure attachment to the loading plate.

Made in Australia for Australian conditions, best ramps on the market – Now you're talking!

Hedge Trimmer

We are pleased to announce a new addition to our ever increasing line of high quality attachments. The Auger Torque T150 Hedge Trimmer.

The Auger Torque Hedge Trimmer is the perfect addition for excavators (1.5T - 8T) and Skidsteer loaders, and offers a variety of motor sizes to suit your application. The newly designed mounting frame allows you to quickly switch the Hedge Trimmer between the left and right hand side of the parent machine. When fitted to a Skid Steer, it can also be used to cut grass and brush. Attaching the optional tooth extension provides a full 2.5m cutting length. This is sure to make trimming more precise, efficient and will provide yet another way to expand the versatility of existing machines.

T150

Oil Pressure Range:	28-220 Bar
Oil Flow Range:	25–75 lpm
Suitable For:	1.5T - 8T Excavate
	Skid Steer Loader
Cutting Length:	1500mm
Max. Cutting Dia:	40mm
Unit Width:	1537mm
Unit Height:	292mm
Unit Depth:	357mm
Unit Weight:	69 kg
Hitch Options:	Double Pin Hitch
	Skid Steer Frame
Hoses Included:	Yes

EXTENSION Cutting Length: 1000mm Unit Width: 1058mm Unit Height: 120mm Unit Depth: 217mm Unit Weight: 26 kg

FEATURES

Suits 1.5 to 8T excavators and Skid Steer Loaders
Variety of motor sizes
1.5m cutting length
1m cutting extension (optional)
Quickly switch between left and right side cutting
Cut branches up to 40mm diameter
Replaceable cutting teeth
Neat and accurate cut
High performance
Extreme durability
Low maintenance
Hoses included
Delivered ready to use

Skid Steer Loader Pallet Forks

Ideal for site locations where pallet handling is needed but the site is unmade or too rough for a fork lift truck.

FEATURES

- O Large range of tine options available up to 2000 Kg's
- O Fully adjustable tines with locking pins
- O Tines are fixed at the top and heel preventing bouncing while carrying loads
- O High visibility brick guard giving you good vision whilst loading and unloading - crucial in a safety conscious age
- O Side step for easy entry and exit of the cab
- O Can be disassembled and packed into a compact storage space when not in use

MEDIUM CAPACITY PALLET FORKS Weight Capacity: 1500ka Assembled Height: 930mm Weight Capacity: 1800kg Tine Height: 550mm 1185mm Tine Height: 550mm Assembled Width: Tine Width: Assembled Length: 1340mm 100mm 80mm Tine Width: Tine Lenath: 1070mm Kit Weight: 176ka Tine Length: 1220mm 40mm Tine Thickness: 40mm Tine Thickness:

Mixer Bowls

Available with a 180 Litre capacity, the Auger Torque Mixer Bowl attaches quickly and easily to our Earth Drills.

Mixing in inaccessible areas where stand alone machines are not practical has never been easier. Skidsteer and Excavator mount brackets are available. A Mixer Bowl is the perfect addition to our Mini Loader Earth Drill range.

Ideal for fencing contractors, with the aid of the Mixer Cradle Hitch the Auger can be quickly removed and the Mixer Bowl attached and locked in place with the standard Auger Pin. After the concrete has been laid the Auger can be replaced for the next post.

When used on Skidsteer machines the mixer bowl requires the use of a mixer cradle that is mounted easily to any of our Skidsteer loader frames.

EXCAVATORS 1 - 8 TONNES, MINI LOADERS & SKID STEERS

Machine Compatibility:	X1500 - 7000MAX
Bowl Capacity:	180 Litres
Unit Depth:	690mm
Unit Diameter:	724mm
Unit Weight:	33kg

Technical data may be subject to change without notice.

Stump Planers

Removal of tree stumps is a job which, at best, is noisy, messy and time consuming. Traditional methods of removal shower chippings over a wide area making clean up a time-consuming exercise.

With the Auger Torque Stump Planer, tree stumps are removed effortlessly and quietly and clean up time is reduced significantly.

The Auger Torque Stump Planer is the quick and easy attachment to any Earth Drill for the effective, clean removal of tree stumps of any size.

If you need to clear ground in preparation of works or earth drilling there is no better way to remove the remains of trees. Stump Planers are available in numerous sizes with a range of different hub options for different demands.

Quick and easy with minimal mess compared to traditional stump grinding makes this a must-have product for those working in ground preparation and woodland maintenance.

Hardened Steel blades

Hardened Steel pilot

Stability bars

STUMP SP 250 PLANER

EXCAVATORS 1 - 5 TONNES & SKIDSTEERS

Earth Drill Compatibility:	X2500 - 4500MAX
Diameter:	250mm
Length:	635mm
Hub Options:	65 Round
Unit Weight:	25 kg

Technical data may be subject to change without notice.

EXCAVATORS 4.5 - 8 TONNES & HIGH FLOW SKIDSTEERS

 Earth Drill Compatibility:
 5500MAX - 8000MAX

 Diameter:
 350mm

 Length:
 675mm

 Hub Options:
 75 Square

 Unit Weight:
 33 kg

Technical data may be subject to change without notice.

The unique pilot engages with the top surface of the tree stump drawing the tool down allowing the blades to engage with a clean horizontal cut.

As the blades rotate they shave the wood into a tidy pile and pull the planer down further.

MULTI-PASS CUTTING PATTERN

Tackle very large tree stumps with ease by making multiple cuts in a spiral pattern, starting from the outside and working towards the centre.

6

When the planer has achieved a deep cut, reposition to overlap the first hole and repeat the process until all of the stump is removed.

Stump removal is now a clean and quiet operation which can be performed quickly and efficiently by a single operator.
