

PRODUCT GUIDE

DELIVERING GROUNDBREAKING PERFORMANCE

RUSSIA

A Customer-Driven Global Company

Established in Europe in 1998, Auger Torque has created a new standard in the Earth Drill and Trencher Attachment market by putting you, the customer, at the centre of everything we do.

In 2005, after surveying the market carefully, we released a new range of innovative products, designed to provide unrivalled reliability and cost effective operation.

Auger Torque is proud to have become part of the Kinshofer Group of companies in 2015. With the backing of the German attachments giant Auger Torque has since enjoyed even greater growth in all areas of its business operations.

Auger Torque's five manufacturing bases around the globe are busy satisfying the ever-growing demand for high-quality products in over seventy countries and on all seven continents.

Auger Torque - A manufacturing company with Global distribution and dealer networks.

Innovation and Special Features

Robust Construction

DURABILITY

- O Manufactured from high grade materials and precision engineered components
- O Designed to withstand extreme working conditions
- O High grade synthetic gear oil used for extra protection and long service life

Non-Dislodgement Shaft SECURITY

- O Unique design
- O Single piece drive shaft
- O Lifetime warranty against shaft dislodgement

Shallow Pitch Flights

Planetary Gearbox

O Torque amplified

O Extreme durability

O High efficiency

O Designed, manufactured and

assembled by Auger Torque

EFFICIENCY

POWFR

- O Piling industry technology
- O Holds earth on flights on removal
- O Most efficient ratio between quantity of earth removed and speed of operation

Pilots

TOUGHNESS & ACCURACY

- O Earth, Tungsten, Extra Dig and Rock Pilots
- O Tough forged construction
- O Easy fitting

Pilot Extensions

ACCURACY

- O Allows an auger to hold its axis accurately in tough ground conditions
- O Improves performance on sloping ground
- O Simple fitting

Telescopic Extensions

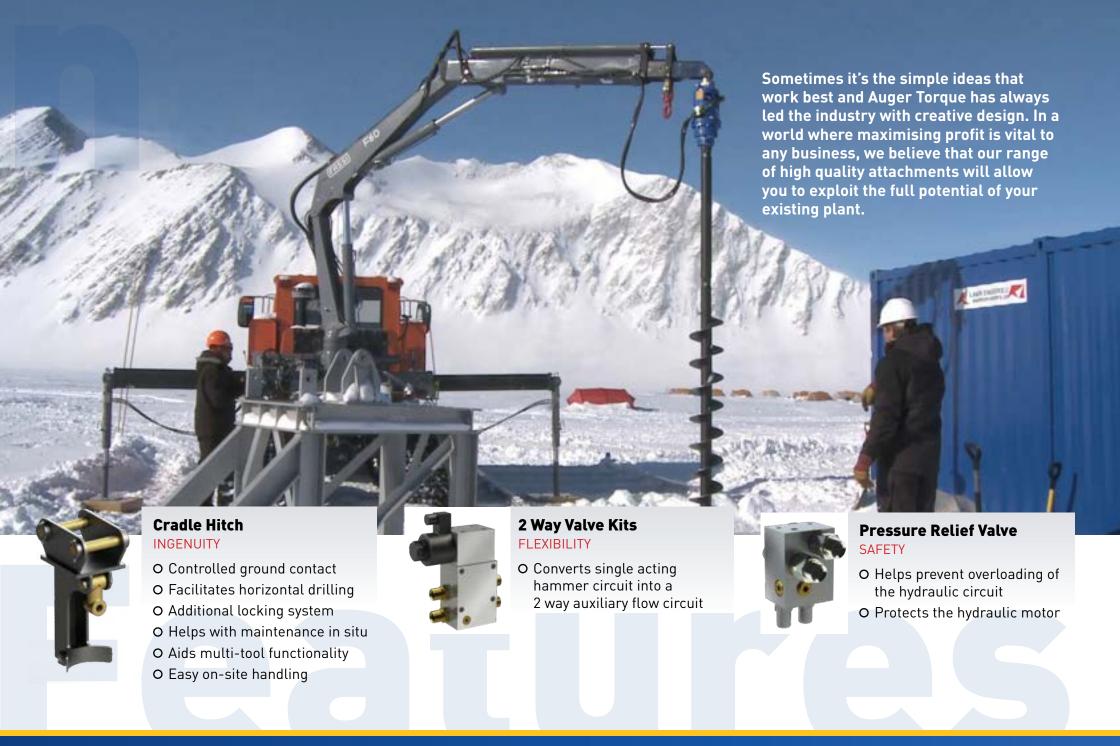

ADAPTABII ITY

- O Improves efficiency for deep hole drilling
- O Innovative design significantly reduces swap-over time
- O Easy adjustment to 3 heights
- O Available for S5, S6 and PA augers

- O Fresh cut every revolution
- O Tooth holders angled to direct spoil onto auger flights efficiently
- O Spoil broken up thoroughly
- O Avoids clogging

Designed for Your Environment

At Auger Torque we realise that one of the best ways to continually improve our extensive range of quality attachments is to not only listen to customer feedback but to put practical ideas into production. This policy of direct customer involvement has given us the reputation of being the specialists in the trenching and auger drive industry world-wide.

Our products incorporate many development features. The trench cleaner on our Trencher Attachments ensures a good clean cut with no residual spoil.

Quality is at the forefront of our philosophy.

Our R&D Test Facility puts our attachments through rigorous test procedures that exceed real-life demands.

All of our gearboxes use precision engineered components.

EARTH DRILLS

Features of our Earth Drills

FORGED HOOD EARS

Standard with all Earth Drills in areas that we know will take a lot of strain. All hood pins are locked for extra safety making it impossible for the hood to detach from your hitch.

HOSES & ADAPTORS

All Earth Drills come standard with high quality hoses and adaptors (excludes larger units. QRC's not included).

ROBUST HYDRAULIC MOTORS

Auger Torque's huge buying power means we work closely with high quality suppliers to develop the most reliable attachments available on the market today.

EPICYCLIC GEARBOX

Torque is amplified by using the unique Auger Torque planetary gearbox. This system allows the motors output torque to be multiplied with extreme efficiency as well as ensuring the durability and reliability you need.

NON-DISLODGEMENT SHAFT

Unique to Auger Torque, the Non-Dislodgement Shaft is a single piece drive shaft assembled top down and locked into the Earth Drill housing. This design guarantees that the shaft will never fall out, making for a safer work environment, not only for the operator but also any surrounding workers, a MUST-HAVE FEATURE for any safety conscious company.

Truck Cranes & The Rope Wind Hitch

Growing in popularity, truck cranes allow a great deal of flexibility when working off site. On-board hydraulics allow trucks to deliver materials where no loading facilities are available.

Equally, remote working can be made easy by using the truck crane boom for earth drilling operations. Flat bed trucks equipped with Truck Crane Earth Drills turn telegraph and power pole as well as street light installations into a single man operation and foundation piling can all be facilitated with the use of one vehicle.

The ingenious Auger Torque Rope Wind Hitch allows for safe and secure storage during transit without the need to disassemble the unit from the boom.

BOOM CLAMP

Auger Torque manufactures all hitches in-house, ensuring custom precision fit to any crane*.

ROPE WIND HITCH

A simple but effective solution for transporting an Earth Drill on a Truck Crane. Utilising the rotation of the Earth Drill the unit can be lifted up under the boom of the crane after use and locked into position, making the whole unit secure during travel.

ROPE WIND AUGERS

Available in diameters from 150 to 800mm*.

*Contact Auger Torque for further details.

AUGERS

Features of our Augers

HUB OPTIONS

Augers are available with all major standard hubs on the market, including:

2", 2.5", 3"and 4" Hex 50mm, 2" and 65mm Round 57mm, 75mm, 100mm, 110mm and 130mm Square ...to name but a few.

HEAVY DUTY TUBE

We know that our Augers can expect a tough life so we only use the highest grade steel and vary our tube size according to machine size and application. Our Augers have a reputation of being the toughest on the market.

SHALLOW PITCH FLIGHTS

By working with and, more importantly, listening to operators feedback we have developed the perfect pitch for our flights. It will cut at its maximum efficiency and, most importantly the spoil will stay on your Auger when you remove it from the hole.

SHOCK LOCK TOOTH Locking System

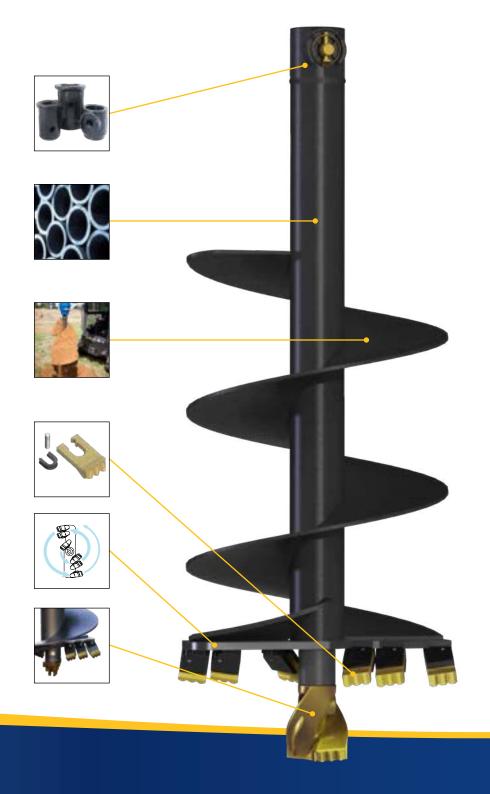

Are you tired of losing your teeth down the hole? With our Original **Shock LockTM** Tooth Locking System loss is now a thing of the past. The simple but effective locking pin holds teeth secure in both directions.

CONSTANT SPIRAL CUT

Our boring heads are designed with a Constant Spiral Cut. Teeth are located so that each makes its own fresh cut on every revolution and are angled to direct spoil towards the centre of the auger. The tooth cutting angle ensures spoil is broken up thoroughly to avoid any clogging.

PILOT AND TOOTH OPTIONS

Auger Torque Augers are offered with many different tooth and pilot options to suit your specific need. For example in the S4 range we offer up to five different combinations and we have the know-how to help you select the optimal configuration.

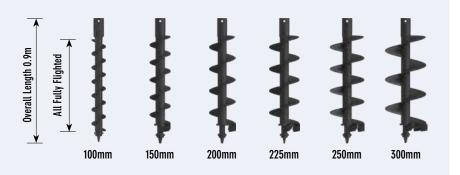

S2 AUGERS

MICRO EXCAVATORS 0.75 - 1 T

With our Original **Shock Lock™** Tooth Locking System tooth loss is now a thing of the past. Using the Shock Lock™ pin and rubber in our unique Shock Lock™ tooth holders ensures your Auger teeth are safely locked in place and protected against shock fractures.

Replacing worn teeth is a breeze with this system, simply knock out the old pin with a standard hole punch and the tooth will slide out of the holder with ease. Acclaimed as the best system on the market you will never need to worry about fitting spare teeth due to losing them again.

Hard Rock Auger

For the most demanding drilling situations

The Hard Rock Auger from Auger Torque has been designed and engineered to fulfil the most demanding of drilling situations.

Designed for drilling in fractured hard rock and extremely abrasive conditions. Optimised in direct collaboration with operators specialising in hard rock drilling applications we are excited to offer the Hard Rock Auger Range globally.

A perfect choice for excavators between 10-50T, these augers are designed to get the hole drilled when regular rock augers start to refuse. Made to spec from the highest grade steel, we are confident our hard rock auger range will stand up to the toughest of applications time & time again.

HUB OPTIONS

Hard rock augers are available in 2 popular sizes; 75mm and 110mm square.

HEAVY DUTY TUBE

Heavy wall pipe for rotational strength. 20mm thick starter flights, optional hard facing will ensure this auger performs in the toughest of grounds.

AGGRESSIVE TAPERED CUTTING HEAD WITH ROTATING PICKS

Designed for drilling in hard rock and extremely abrasive conditions.

TAPERED CUTTING PATH

Our cutting heads are designed with a constant spiral cut. Teeth are located so that each tooth makes its own fresh cut on every revolution and are angled to direct spoil towards the centre of the cutting head. The tooth cutting angle ensures spoil is broken up thoroughly to avoid any clogging.

ROCK PILOT AND TEETH WITH ROTATING ROCK PICKS

The hard rock augers are offered with our rotating rock teeth and pilots. Designed so only the rotating picks wear not the pockets/ holders.

FEATURES

- O Drilling performance is increased due to precisely calculated tooth positions along the edges of the cutting head
- O Improved productivity when cutting through hard ground and fractured rock
- O The positioning of the teeth increases the penetrative forces which can be found on the tooth cutting edge
- O This increase in force fractures the substrate into large pieces bringing them to the surface at an increased rate compared to traditional cutting heads

SPECIFICATIONS

We currently offer the following sizes: Ø300mm Ø450mm Ø600mm and Ø750mm

- O Rotating Pick Rock Teeth on tapered cutting head
- O Standard 110mm Square Hub (PA) & 75mm Square Hub (S6)
- O 20mm starter flight & 12mm for remaining flights
- O Standard length is 2.4m, custom sizes & continuous flight available
- O Custom diameters available on request
- O Hard Facing available
- O Can be made fully flighted in timed sections (CFA)

High Torque Earth Drills

Part of the heavy duty range in the Auger Torque product line up. Geared towards high torque applications.

70 000MAX & 80 000MAX

These drive units are an ideal option for excavators ranging from 21 to 45T, specifically engineered for high-torque applications. Despite weighing less than 800kg, we've successfully minimized weight for enhanced versatility without compromising the durability our drives are known for. Featuring a large 130mm square or hex shaft, we are confident they will withstand even the most demanding applications repeatedly.

130MM DRIVESHAFT

The driveshaft is crucial for reliability and it goes without saying that the bigger the better applies here. Offered standard as 130mm Square and optional 130mm Hex.

SINGLE PIECE NON-DISLODGEMENT SHAFT

As standard with all of our auger & screw pile drives, our Original single-piece non-dislodgement shaft is of course a standard feature. We are so confident in this must have safety feature that we are covering it with a lifetime warranty.

ROBUST HYDRAULIC MOTORS

Auger Torque's huge buying power means we work closely with high quality suppliers to develop the most reliable attachments available on the market today.

EPICYCLIC GEARBOX

Torque is amplified by using the unique Auger Torque planetary gearbox. This system allows the motors output torque to be multiplied with extreme efficiency as well as ensuring the durability and reliability you need.

100 000MAX & 150 000MAX

A perfect choice for excavators between 21-50T, these drive units are designed specifically for high torque applications. With weights under 1.5T, we have managed to keep the weight down for versatility whilst not sacrificing any of the robustness our drives are renowned for. Running a massive 150mm HEX shaft we are confident it will stand up to the toughest of applications time & time again.

150MM HEX SHAFT

The driveshaft is crucial for reliability and it goes without saying that the bigger the better applies here. A shaft is always stronger when machined as a hex and the 150mm diameter is the largest in the industry, especially when looking at compatibility on machine as small as 21T.

AXIAL PISTON MOTOR

Axial Piston Motors allow us to run a single speed motor. By using an axial piston motor with our drive we can have a high speed motor but still achieve high torques through the gearbox multiplication. At maximum flow we achieve 15 rpm.

SINGLE PIECE NON-DISLODGEMENT SHAFT

As standard with all of our auger & screw pile drives, our Original single-piece non-dislodgement shaft is of course a standard feature. We are so confident in this must have safety feature that we are covering it with a lifetime warranty.

EPICYCLIC GEARBOX

Torque is amplified by using the unique Auger Torque planetary gearbox. This system allows the motors output torque to be multiplied with extreme efficiency as well as ensuring the durability and reliability you need.

Cradle Hitch

APPLICATIONS

- O Large diameter & deep auger drilling
- O Hard Rock Auger drilling
- O Core barrel drilling
- O Pole and mast installations
- O Foundation piles
- O Large diameter screw pile installations
- O Rail applications
- O Exploration & research
- O Compatible with excavators from 21T onwards allowing for low impact and reasonably tight access application where typically larger machines would have to be used

Screw Pile Installations

Many of Auger Torque's Earth Drills, from the robust Earth Drill 10,000 upwards, are excellent tools for screw pile installation due to their high levels of torque and range of rotational speed.

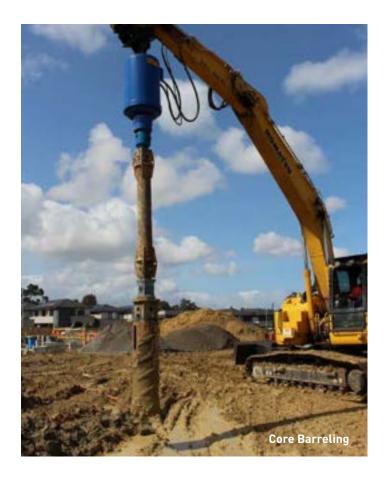

Screw piles can be used as a steel foundation solution for railway and highway installations, masts, towers, cantilever gantries, platforms, lighting columns and sign posts. They support structures in both tension and compression, providing an ideal solution where overturning forces are significant or when ground conditions aren't suitable for other methods of foundation.

Quick and easy to install, in many cases the piles and associated structures can be installed in a day.

Made from galvanised steel, Screw Piles are also maintenance free and reusable after removal from temporary installations.

BENEFITS OF SCREW PILES INCLUDE

- O Quick and easy to install
- O No concrete mixing or curing time
- O No excavations needed or spoil to remove
- O Suitable for soft or mixed composite ground
- O Installations possible in low temperatures and wet conditions
- O Can be installed around existing underground services
- O Removable and re-useable

TRENCHER ATTACHMENTS

Features of our Trenchers

HIGH QUALITY MOTOR AND GEARBOX

Using only the highest quality hydraulic motors that allow flow rates of up to 150LPM and then amplified by Auger Torque's own 'bullet-proof' planetary gearbox means that our trenchers have the reliability you need and the power to ensure your trenching is carried out with ease.

EPICYCLIC GEARBOX

Torque is amplified by using the unique Auger Torque planetary gearbox. This system allows the motors output torque to be multiplied with extreme efficiency as well as ensuring the durability and reliability you need.

MULTIPLE TEETH COMBINATIONS

Chains are available in a number of different teeth configurations for trenching in soft ground, mixed grounds and even permafrost, allowing you to get the job done quickly.

ADJUSTABLE DEPTH SKID

A great feature that will make your job much easier is the precision depth control skid, which enables the operator to set the machine at up to three different trench depths.

RAPID CHAIN ADJUSTMENT

Utilising a simple grease point and grease gun, chain adjustment is quicker than ever.

DOG LEG BOOM PROFILE

Provides a larger spacing between chain and boom for improved spoil clearance and reduced boom and chain wear.

HOSE & ADAPTOR OPTIONS

All Trenchers are supplied as standard with high quality hoses and adaptors.

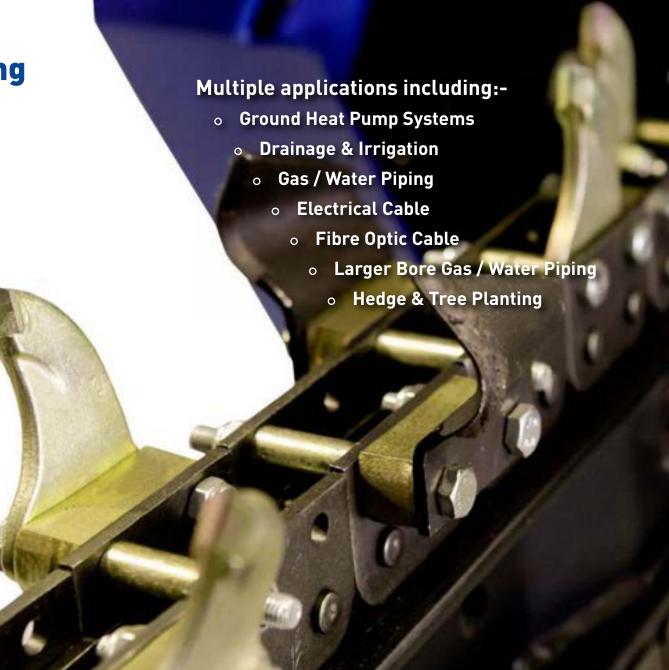

The days of your trenching bucket may well be over.

The laborious task of digging a trench has been transformed since the advent of the Trencher Attachment.

Suitable for Skidsteer Loaders and Excavators, Auger Torque's range of Trenchers cover depths from 0.6 to 1.5 meters and widths up to 350mm. The spoil is piled neatly to one side of the trench by the integral auger.

Experience how Trencher Attachments can make light work of your construction project.

Aluminium Ramps

Auger Torque Aluminium Loading Ramps have long set the standard by which other ramps are judged.

With carrying capacities ranging from 1.5 to 8 tonnes, our ramps are overengineered to ensure they can safely accept steel or rubber tracks and pneumatic tyres. This means you no longer need to have individual ramps to cope with various means of traction. One set of Auger Torque Loading Ramps does it all.

We use only the highest grade alloy, ensuring that Auger Torque aluminium ramps will have a long and reliable service life.

All our ramps incorporate a unique design feature which prevents bottoming out when loading or unloading. All ramps are supplied with forged locking pins to ensure safe and secure attachment to the loading plate.

Made in Australia for Australian conditions, best ramps on the market – Now you're talking!

Skid Steer Loader Pallet Forks

Ideal for site locations where pallet handling is needed but the site is unmade or too rough for a fork lift truck.

FEATURES

- O Large range of tine options available up to 2000 Kg's
- O Fully adjustable tines with locking pins
- O Tines are fixed at the top and heel preventing bouncing while carrying loads
- O High visibility brick guard giving you good vision whilst loading and unloading crucial in a safety conscious age
- O Side step for easy entry and exit of the cab
- O Can be disassembled and packed into a compact storage space when not in use

Weight Capacity: Tine Height: Tine Width: Tine Length: Tine Thickness: 1500kg 550mm 80mm 1070mm 40mm

MEDIUM CAPACITY PALLET FORKS

Assembled Height: 930mm
Assembled Width: 1185mm
Assembled Length: 1340mm
Kit Weight: 176kg

Assembled Height: 930mm
Assembled Width: 1185mm
Assembled Length: 1490mm
Kit Weight: 196kg

Technical data may be subject to change without notice.

Mixer Bowls

Available with a 180 Litre capacity, the Auger Torque Mixer Bowl attaches quickly and easily to our Earth Drills.

Mixing in inaccessible areas where stand alone machines are not practical has never been easier. Skidsteer and Excavator mount brackets are available. A Mixer Bowl is the perfect addition to our Mini Loader Earth Drill range.

Ideal for fencing contractors, with the aid of the Mixer Cradle Hitch the Auger can be quickly removed and the Mixer Bowl attached and locked in place with the standard Auger Pin. After the concrete has been laid the Auger can be replaced for the next post.

When used on Skidsteer machines the mixer bowl requires the use of a mixer cradle that is mounted easily to any of our Skidsteer loader frames.

EXCAVATORS 1 - 8 TONNES, MINI LOADERS & SKID STEERS

Machine Compatibility: X1500 - 7000MAX
Bowl Capacity: 180 Litres
Unit Depth: 690mm
Unit Diameter: 724mm
Unit Weight: 33kg

Technical data may be subject to change without notice.

Cone Crusher Bucket

The new Auger Torque Cone Crusher Bucket provides a simple, efficient, and cost-effective way to reprocess and/or recycle small volume construction rubble and debris, into usable aggregate/hardcore.

FEATURES

- O Easy to use and compact for small working sites
- O Compatible with excavator, backhoe, mini loader, telehandler and skidsteer
- O Bucket mouth allows for effective scooping and sorting
- O Seven sided rotating cone inside a cylindrical drum
- O Grinding faces made in steel and tungsten carbide
- o Built around a series 3.5 sub gearbox
- O Auger Torque's industry leading warranty

APPLICATIONS

- O Rubble crushing and hardcore creation
- O Recycling and repurposing waste
- O Use to crush house bricks, breeze blocks, concrete pavers, asphalt, natural limestone, poured concrete and more
- Suitable for, and not limited to, grounds maintenance, forestry road and farm track repair, agriculture and repurposing outbuildings

Hose Guiding Plates - For safe routing of hydraulic hoses between parent machine and Cone Crusher attachment.

MATERIAL THROUGHPUT

Material Throughput

Mixed material throughput = up to 5 tonne per hour. Brick throughput = up to 9 tonne per hour.

Output material = up to 60mm.

Drum Cutter

The KDC-Series features a robust spur gearing and is driven by high torque motors – the range is also equipped with gear a reduction facility to increase overall cutting force.

The optimal drum and pick choice guarantees high performance levels in the toughest environments – in both loosening material and reducing overall wear.

Componentry has been specifically selected to provide maximum penetration and minimum vibration/noise levels. A heavy duty sealing system means working underwater to a depth of 20 metres is also possible.

FEATURES

- O Low noise and vibration levels
- O Robust spur gear for maximum performance
- o Waterproof to 20m
- o Different adapters available
- O Adjust hydraulic motor to suit excavator
- o Fast, easy exchange of wear parts
- O Large drum and pick assortment
- O Optional 360° rotation for greater access

^{*}drum cutters can be fitted with a profiling drum — ask your local Auger Torque dealer.

Hedge Trimmer

The Auger Torque Hedge Trimmer is the perfect addition for excavators (1.5T - 8T) and Skidsteer loaders, and offers a variety of motor sizes to suit your application.

The newly designed mounting frame allows you to quickly switch the Hedge Trimmer between the left and right hand side of the parent machine. When fitted to a Skid Steer, it can also be used to cut grass and brush. Attaching the optional tooth extension provides a full 2.5m cutting length. This is sure to make trimming more precise, efficient and will provide yet another way to expand the versatility of existing machines.

FEATURES

- o Suits 1.5 to 8T excavators and Skid Steer Loaders
- o Variety of motor sizes: 50cc, 80cc, 100cc
- o 1.5m cutting length
- 1m cutting extension (optional)
- o Quickly switch between left and right side cutting
- o Cut branches up to 40mm diameter
- o Replaceable cutting teeth
- Neat and accurate cut
- o I ow maintenance

o High performance

o Hoses included

o Extremely durable

o Delivered ready to use

Variable Mulcher

Suitable for excavators and skid steer loaders, these mulchers are designed and manufactured to handle the toughest clearance applications through to precise hedge trimming.

What really makes this mulcher unique is the option of different drums, so whatever the job at hand you can easily switch between the options, providing the ultimate solution for all your land clearing needs.

VM1000 VM1500 Oil Pressure Range: 220-240 Bar Oil Pressure Range: 160-180 Bar Oil Flow Range: 60-70 lpm Oil Flow Range: 85-95 lpm 10T - 15T Excavators Suitable For-5T - 10T Excavators Suitable For-Skidsteer Loaders Skidsteer Loaders Drum Cutting Width: 1000mm Drum Cutting Width: 1500mm 2400rpm (machine dependant) Drum Speed: 2400rpm (machine dependant) Drum Speed: 120mm 250mm Max. FEATURES

- o Working width options of 1m and 1.5m
- o Interchangeable drum Easily swapped onsite
- o Fixed tungsten and swinging hammer tooth options
- o Optimised cutting teeth preventing drum stall
- Heavy duty steel construction
- o Heavy duty bearings and triple belt system
- o Hinged door for easy drum access
- o Replaceable skid plates

APPLICATIONS

- o Ground clearance
- Woodland pathway creation and maintenance
- o Clear and maintain vegetation
- o Tree and hedge trimming
- o Mulch trees and hedges down to ground level
- o Fire break creation

TC Range Mulcher

Heavy operations such as bushwood clearance or land maintenance are perfect applications for the TC Range Mulcher.

This attachment is rugged and durable, thanks above all to its reinforced casing with double bottom, which provides outstanding resistance to impacts and torsional forces. The shielded bearings of the rollers protect them from collisions with material in the mulching area. Use this renowned attachment on excavators from 1.5T to 6.5T.

FEATURES

- o Shaft equipped with either blade or hammer set up
- o Adjustable height support roller
- O Robust motor and hoses
- Self levelling frontal plane
- Highly resistant with integrated valve unit as standard

APPLICATIONS

- o Ground clearance
- o Woodland pathway creation and maintenance
- o Clear and maintain vegetation
- o Tree and hedge trimming
- o Mulch trees and hedges down to ground level

Stump Planers

Removal of tree stumps is a job which, at best, is noisy, messy and time consuming. Traditional methods of removal shower chippings over a wide area making clean up a time-consuming exercise.

With the Auger Torque Stump Planer, tree stumps are removed effortlessly and quietly and clean up time is reduced significantly.

The Auger Torque Stump Planer is the quick and easy attachment to any Earth Drill for the effective, clean removal of tree stumps of any size.

If you need to clear ground in preparation of works or earth drilling there is no better way to remove the remains of trees. Stump Planers are available in numerous sizes with a range of different hub options for different demands.

Quick and easy with minimal mess compared to traditional stump grinding makes this a must-have product for those working in ground preparation and woodland maintenance.

Hardened Steel blades

Hardened Steel pilot

Stability bars

EXCAVATORS 2.5 - 5 TONNES & SKIDSTEERS

Earth Drill Compatibility: X2500 - 4500MAX

Diameter: 250mm Length: 635mm

Hub Options: 65mm Round / 75mm Square

Unit Weight: 25 kg

Technical data may be subject to change without notice.

EXCAVATORS 4.5 - 8 TONNES & HIGH FLOW SKIDSTEERS

Earth Drill Compatibility: 4500MAX - 8000MAX

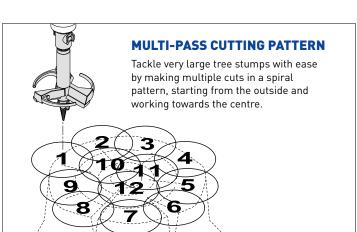

Diameter: 350mm Length: 675mm

Hub Options: 65mm Round / 75mm Square

Unit Weight: 33 kg

Technical data may be subject to change without notice.

The unique pilot engages with the top surface of the tree stump drawing the tool down allowing the blades to engage with a clean horizontal cut.

As the blades rotate they shave the wood into a tidy pile and pull the planer down further.

When the planer has achieved a deep cut, reposition to overlap the first hole and repeat the process until all of the stump is removed.

Stump removal is now a clean and quiet operation which can be performed quickly and efficiently by a single operator.

Log Splitter

It's quick and efficient. Augertorque's new Log Splitter for processing and recycling logs.

The compact and robust Log Splitter makes light work of processing those fallen trees into manageable pieces.

As the Log Splitter rotates, the self-guiding threaded body engages with the timber and draws the splitter into the log. The conical shape quickly works its way through the log, splitting the log in two. For larger logs, the Splitter can be repositioned to continue the split along the whole length of the log.

EXCAVATORS 1 - 8 TONNES TELEHANDLERS& SKIDSTEERS

Earth Drill Compatibility: X1500 - 8000MAX

Diameter: 180mm Length: 300mm Hub Options: 65 Round

(75mm square adaptor available)

Unit Weight: 14.6 kg

Technical data may be subject to change without notice.

Log Splitter Hitch with Locking Kit

KINSHOFER

Auger Torque. Part of the Kinshofer Group.

The Kinshofer Group is one of the world's leading designers and manufacturers of attachments for construction machinery, such as excavators, backhoe loaders, skidsteer loaders, knuckle boom cranes and forklift trucks.

The Kinshofer Group is a One-Stop-Attachment-Shop to our customers around the globe.

Day in and day out, all year 'round, people's decisions and needs create demand for transport and infrastructure solutions. Without the type of product and services the Kinshofer Group provides, the societies, where many of us live, would not function.

Find a wide range of attachments for excavators here and even more on the Kinshofer website www.kinshofer.com

Kinshofer. Simply moving the world with us.

25 companies and 13 brands with more than 4,500 products for loader cranes, excavators and skidsteers
